Mittagong Aero Club

Mittagong Airfield - Site Safety Induction briefing notes

Mittagong Aero Club values a safe operating environment for the benefit of its members and all users of Mittagong Airfield.

Anyone entering Mittagong Airfield must have completed a Site Safety Induction, unless they are accompanied by an individual who has completed a Site Safety Induction.

Anyone entering the aerodrome accepts there are inherent risks associated with aviation and being near aircraft. The risk control measures identified in the Mittagong Aero Club Safety Risk Register must be understood and complied with by all users of the aerodrome.

Please see overleaf for details of first aid and emergency contacts.

Please take particular note that the following apply to anyone on the aerodrome:
- Anyone under the influence of drugs or alcohol are not permitted
- All relevant Work Health and Safety laws and regulations must be complied with
- If you accompany a visitor to the aerodrome you are responsible for ensuring they comply with the risk control measures
- All vehicles are required to travel to and from hangar areas as prescribed in the club's 'Rules for Safe Vehicle Movements at the Airfield'

Mittagong Airfield safety documents can be found here:
www.mittagongaeroclub.com/airfield-safety

Please indicate your acceptance of the above by submitting a Site Safety Induction Form.

Mittagong Airfield

VEHICLE ACCESS TO HANGARS

Do not drive across the runway or runup bay.

All vehicle access to and from hangars is via the western end, behind the 06 runway threshold. Maximum speed 20km/h. Keep to the grass verge. Avoid driving on the gravel unless the grass is too wet.

This is necessary for safety, and to keep the runway surface clear of gravel.

If you grant access to any visitors or contractors, you must ensure they comply with these rules.
